

# Point&Scroll™

*Two button, programmable scrolling mouse for Mac USB*

Interex brand - June 1999

**XLR8's Point&Scroll™ mouse brings new functionality to your fingertips.** First there was "Point and Click," now there's Point&Scroll™! This unique mouse combines a long-standing PC capability of "scrolling" with the Mac's elegant user interface.

You get single-click programmable access to keyboard shortcuts, Contextual Menus and key commands. The "hot" red scroll wheel transforms your cursor into a pointer. Now you can easily scroll in any direction and at any speed, without ever moving your mouse. Read, proof, track, plot, and play games easier than ever before.

Connects to any Mac USB port via hub or card.

Only from **XLR8**.

*Totally Programmable...  
Great for right or left handed use!*

*Universal Compatibility...*

*Three-button Functionality*

*Ice, Black or Putty Colors*

# Point&Scroll™

Two button, programmable scrolling mouse for Mac USB

## Specifications

### System Requirements

Power Macintosh®/iMac®/PowerBook® computer with USB 1.x capability or greater (XLR8 DualPort USB recommended for PCI Macs with limited USB capability)

### Software

Apple Mac OS upgrade link

Apple QuickTime upgrade link

Adobe Acrobat Reader

XLR8 PowerPack – Includes PowerControl testing and RAM configuration application with PowerFrax and PowerPC Fractal Generator

### Colors

Available in Three Sharp Color Choices:

Black - Versatile Black looks hot with new or older systems

Ice - New Cool Ice color works with any system colors

Putty - The long-time color of Macintosh (combine with DualPort USB for "pre-USB" Macs)

### Also included in XLR8's USB Performance Package (for PCI)

XLR8 Point&Scroll is included in XLR8's USB Performance Package (with DualPort USB) and is compatible with all PCI PowerMacintosh systems and clones.

The complete USB Performance Package includes:

**Point&Scroll Mouse™**: XLR8's unique USB scrolling mouse available in putty, black or ice. Includes added support for Apple Game Sprocket, horizontal scrolling and scroll lock.

**DualPort USB™** card adds a full 12 Mbit/sec USB throughput to any PCI PowerMac. Great for new PowerMacs with high-end "port hogs" too.

**MACH Speed Control™**: Cache blasting software that provides automated cache/CPU performance and compatibility software for upgrades and PCI systems.

**PowerControl™** testing, diagnostics, RAM/PCI/SCSI configuration application

**PowerFrax™** dynamic benchmarking and graphic fractal generator
